

# Breathing Apparatus and Safety Equipment Hire

Sembcorp Protection provides a safety equipment hire service designed to meet the needs of industrial organisations. The equipment may be required for hazardous situations, plant overhauls or other major events. It may only be required for an annual occurrence or one off project.

Hiring equipment is a cost effective solution for customers who may not require it permanently. From our vast range of equipment our highly trained engineers will advise you on selecting the right type of equipment.

Legally breathing apparatus must be serviced regularly to ensure proper functioning at all times and records must be kept. Our experienced service engineers will take away the worry by doing this for you.

## Our range of equipment available for hire includes:

- Portable fire extinguishers
- Fire fighting equipment
- Breathing apparatus
- Gas detection equipment
- Safety equipment
- Pumps

Those using the equipment need to have a thorough understanding of its functionality. We provide the training required to ensure that users are thoroughly confident and competent in the use of all of our equipment.

## The courses provided are:

- Fire Extinguisher Awareness
- Fire Extinguisher Practical
- Breathing Apparatus 10 Minute Escape Set – Sabre Sprint/Dash
- Self Contained Breathing Apparatus – Sabre Centurion/Contour
- Air Airline Breathing Apparatus – Sabre Astral or Sabre Modul

We also provide Breathing Apparatus and PPE face fit testing. For a detailed overview of the training courses please [click here](#).
